WATERING TIP

June was an extremely dry month with an average rainfall of only 0.9 inches. It is critical that new plants get enough water through their first growing season. To ensure that plants stay healthy, we recommend watering plants by hand each evening in addition to your regular irrigation system schedule.

Your Guide To Summer Happenings..

Insiders Tour of The Pike Place Market Flower Vendors

Experience the dynamic energy of the Pike Place Market during the hustle and bustle of the morning set-up, learn how to select flowers for arrangements and meet local growers. After the Market Tour, return to a classroom setting and learn about locally grown flowers, their harvesting, conditioning and arranging.

Experience *Light Reign* at the Henry Art Museum

Skyspace

James Turrell's Skyspace *Light Reign* became a permanent exhibit at the Henry Art Museum last July. Inside the Skyspace chamber, visitors sit on a bench and view the sky through an opening in the roof.

Skyspace is best experienced through multiple visits at different times of year and day. At night the Skyspace emits an intense array of color created by thousands of LED lights embedded in the glass panels.

Garden Calendar

July

Plant broccoli, gourmet greens and aquatic plants

Prune wisteria for the last time, hedges, heathers and fuchsias

Sow seeds of zinnias, cosmos, nicotiana and sunflowers for later-summer and fall bloom

Water deeply and thoroughly rather than lightly and frequently. Remember to save water by directing sprinklers onto the lawn and beds and not the driveway or sidewalk

Harvest potatoes and onions after tops yellow and die

August

Order bulbs, roses, perennials, ornamental grasses, shrubs, trees, berry bushes and fruit trees now for fall planting

Plant or seed fall and winter vegetable such as green onions, carrots, lettuce, spinach, radishes and cauliflowers

Mow lawns to be on the taller side this month as taller blades encourage deeper root growth

Prune only for shape and spent canes of berry bushes after fruiting

Donate extra produce to your local food bank, Northwest Harvest or Plant A Row For the Hungry

September

Seed or sod lawns, September is also a good time to overseed lawns with bare spots

Sow wildflower meadows by scattering seeds on well-prepared ground, rake lightly and cover with a thin layer of peat moss

Apply a 3 inch layer of organic mulch over the roots of permanent plants to reduce soil erosion and freeze damage this winter

Collect and dispose of rotted fruit to prevent the spread of disease

Divide summer flowering perennials and grasses

Thank you for Supporting the Enumclaw Community Hospital!

We would like to thank our clients and partners who

attended the Enumclaw Garden Tour on May 22nd. More than 300 tour-goers visited the Franklin Country Garden.

This 5-acre retreat, designed, installed and maintained by Lifestyle Landscape, was featured on the tour. Despite the rain and cool temperatures, The Enumclaw Community Hospital was able to raise more than \$8,000 for the Care-Van Program.

The Care-Van is a free community service that provides transportation to medical and health-related appointments.

More than 300 attendees braved the rain to attend the Enumclaw Garden Tour on May 22nd. Proceeds benefited The Enumclaw Community Hospital Care-Van.

Andy Goldsworthy Traveling Exhibit At The Tacoma Art Museum

Tacoma Art Museum presents this nationally traveling exhibition featuring sculptures

made of natural materials such as leaves, stones, and twigs, as well as large-scale photographs that document similar sculptures created by British artist Andy Goldsworthy during his visit to Japan in 1987. Goldsworthy, a highly regarded artist with large-scale commissions throughout the world, relies on the cyclical rhythms of nature to create distinctive works. His art, though sometimes temporary, transforms landscapes into unexpected works of art.

Andy Goldsworthy creates large-scale art installations using materials from nature
